Qualitative Information

Consolidated Business Results for This Period

Overview of Results

(Billions of yen)

	Apr. 1-Dec. 31, 2021	Apr. 1-Dec. 31, 2022	Change
Net sales	525.2	599.3	74.0
Operating profit	44.8	45.4	0.5
Equity in earnings of affiliates	10.9	14.3	3.4
Ordinary profit	58.3	63.7	5.4
Profit attributable to owners of parent	39.3	44.5	5.1

During the first nine months of the fiscal year ending March 31, 2023 (April 1, 2022 – December 31, 2022), the global economy was affected by the prolongation of Russia's invasion of Ukraine which, in turn, led to surges in prices of raw materials, fuels and other items. Around the world, countries have thus been stricken with steep inflation, prompting the financial authorities of the United States, EU members and other nations to lean heavily toward monetary tightening. However, economies are now considered to be at risk of a downturn due to the resulting hikes in interest rates and, therefore, confront the growing likelihood of a further slowdown in global growth. Moreover, the shift in monetary policies led to foreign exchange rate fluctuations while, in China, there were profound repercussions from resurgences of the novel coronavirus. Taking these and other factors into account, the outlook for the operating environment remains unclear.

Against this backdrop, the MGC Group has promoted a medium-term management plan launched in April 2021. In line with this plan, the Group aims to shift to a profit structure resilient to changes in the business environment. To this end, the Group is striving to:

- “Further strengthen competitively advantageous (“differentiating”) businesses,”
- “Accelerate creation and development of new businesses,” and
- “Reevaluate and rebuild unprofitable businesses.”

These efforts will help push ahead with business portfolio reforms. In addition, the Group is countering surges in raw material and fuel prices and transportation costs by revising sales prices upward to align with an overall increase in costs. By doing so, the Group is endeavoring to maintain and enhance its earnings power.

As a result, the MGC Group's net sales increased due mainly to the impact of foreign exchange fluctuations and upwardly revised sales prices aligned with higher raw material and fuel prices, along with the recent inclusion of a South Korea-based polyacetal sales company into the scope of consolidation.

Furthermore, operating profit was virtually unchanged from the same period of the previous fiscal year, despite surges in raw material and fuel prices and transportation costs, along with sluggish demand for electronic materials and other negative factors, thanks primarily to the depreciation of the yen and robust polyacetal sales.

Despite downturns in methanol market prices, ordinary profit increased due primarily to an increase in equity in earnings of affiliates in step with the reversal of deferred tax liabilities at an overseas methanol producing company.

Operating results by segment are as described below.

Results by Business Segment

Basic Chemicals

(Billions of yen)

	Apr. 1-Dec. 31, 2021	Apr. 1-Dec. 31, 2022	Change
Net sales	312.6	360.2	47.5
Operating profit	23.5	18.9	(4.5)
Ordinary profit	28.8	29.0	0.1

The methanol business saw increases in both net sales and earnings thanks to the depreciation of the yen, an increase in equity in earnings of affiliates and other positive factors, despite somewhat lower market prices compared with the same period of the previous fiscal year.

Methanol and ammonia-based chemicals posted a decrease in earnings due to deterioration in neopentyl glycol market prices, despite progress in profitability adjustments offsetting the negative impact of higher raw material and fuel prices.

High-performance products posted a decrease in earnings due mainly to a temporary failure of production equipment for meta-xylenediamine (MXDA) and the resulting decrease in sales volume, despite the higher sales volume of aromatic aldehydes.

Xylene separators and derivatives saw a decrease in earnings due mainly to rises in raw material and fuel prices, and resulting deterioration in the profitability of purified isophthalic acid (PIA).

Foamed plastics posted a decrease in earnings due mainly to rises in raw material and fuel prices outpacing the timing of product price revisions.

Specialty Chemicals

(Billions of yen)

	Apr. 1-Dec. 31, 2021	Apr. 1-Dec. 31, 2022	Change
Net sales	212.4	239.0	26.5
Operating profit	24.4	28.4	4.0
Ordinary profit	31.2	33.5	2.2

Inorganic chemicals posted a decrease in earnings despite growth in the sales volume of chemicals for use in semiconductor manufacturing, due mainly to rises in transportation costs and prices for raw materials and fuel.

Engineering plastics saw increases in net sales and earnings, despite lower sales volumes of polycarbonates and polycarbonate sheet films, thanks to constantly robust sales of polyacetal as well as the inclusion of a South Korea-

based polyacetal sales company into the scope of consolidation.

Optical materials posted earnings on par with the same period of the previous fiscal year amid stagnant demand for smartphones, a primary application of optical polymers, even though earnings escaped the negative impact of inventory adjustments carried out by customers in the prior fiscal year.

Electronic materials saw decreases in net sales and earnings. This reflected such factors as declining demand for general-purpose materials for use in PC-related devices and home appliances, which constitute a part of BT materials for IC plastic packaging, the core product category for electronic materials. Other negative factors included third-quarter stagnation in demand for highly functional materials for use in smartphones and memory devices.

Earnings from oxygen absorbers such as AGELESSTM remained on par with the same period of the previous fiscal year despite the ongoing robustness of overseas sales—which were buoyed by the depreciation of the yen—especially in the food packaging field, due to rises in raw material prices and transportation costs.
